Radii Install Dates Set for Florida Division

Installation of Radii software for TSA Florida is set for the month of December. According to THQ in Atlanta, the software installation will be done remotely by IT staff from FL DHQ. After the holidays, TSA Radii users will return to work and find Radii software already installed on their computers. For those needing a refresher in using Radii Software, online training sessions will be held, and Training Modules will be available.

Radii Software Refreshers Available

If you need a recap on using Radii Software, on-line refresher training sessions will be available. Times and dates will soon be announced. In addition, new Training Modules will be available to all Users. Look for details coming soon.
