

## In Touch

Vol. 1 No. 2 Spring 2008

### TSA Florida Installs Radii Software

Members of TSA Florida IT have been busy installing Radii Software in Florida locations statewide—from laptops to desktop computers. The new changes will gradually make intake and reporting much more efficient as users have more and more experience on the software.

Radii Trainer Nancy Nehls Nelson helps train a caseworker at Western Carolina Rescue Mission in Asheville, NC.

### Online Radii Software Refreshers Available

For those of you who have been trained in using the Radii software but could use a little help remembering the details, we will be offering online refresher sessions for Florida users over the next few weeks. Notices of online sessions will be emailed to you. You must sign up in advance for the sessions you wish to join. This is a free service offered as a courtesy to The Salvation Army. Sessions will be offered 2-3 times per week, and will last approximately 1 hour each.

with your story!*

*The Human Touch*

Do you have an inspiring story about the work you do with the Salvation Army? We want to hear it! We are starting a new column in our *In Touch Newsletter* that features YOU and your story. Yes, we're a software company, but we are also a group of folks who care very much about the *people* we help, and the people *you* help. ***We're listening!*** Submit your stories to: [scain@radiitechnologies.com](mailto:scain@radiitechnologies.com)

### Radii Training Demos—Learn at Your Own Pace!

Your IT staff will soon be installing Radii Software TRAINING DEMOS for use right on your TSA computer. Click it on it to listen or read for quick, easy instructions on the basics of how to use your Radii Soft-
